

ABOUT US

LEVACO stands for decades of experience and expertise in the development and production of innovative solutions. With a strong commitment to quality, sustainability and customized applications, LEVACO provides surfactants for various industries, including agrochemicals, food production and cleaning solutions.

Utilizing state-of-the-art production methods and rigorous quality control measures, LEVACO ensures that its surfactants not only deliver outstanding quality and performance but are also environmentally friendly and sustainable. The company prioritizes renewable raw materials and continuously advances research and development to create surfactants that meet the highest industry standards.

With certified, high-quality products, LEVACO is the ideal partner for companies seeking reliable and innovative surfactants – whether for industrial applications or consumer products.

**SOLUTIONS FOR
PERSONAL CARE**

PERSONAL CARE

From versatile emulsifiers and solubilizers to cleansing and conditioning agents, LEVACO’s selected Personal Care products enable you to develop high-quality and reliable formulations for a wide range of applications.

As an agile, solution-oriented supplier, we combine chemical expertise with close customer collaboration to help you identify the right ingredients for your specific needs.

PERSONAL CARE

PRODUCT OVERVIEW

CHEMICALS			APPLICATION			
PRODUCTS	INCI / CHEMISTRY	BENEFIT	EMOLLIENT	RINSE-OFF	SKIN CARE	HAIR
LUCRAMUL COH 07	PEG-7 Hydrogenated Castor Oil	water-in-oil (W/O) emulsifier, intensive skin emollient, for overnight creams or water-resistant sunscreen lotions	x		x	
LUCRAMUL COH 16	PEG-16 Hydrogenated Castor Oil	oil-in-water (O/W) co-emulsifier, pigment wetting agent	x		x	
LUCRAMUL COH 40	PEG-40 Hydrogenated Castor Oil	high-performance fragrance and essential oil solubilizer, forming transparent microemulsions	x	x	x	x
LUCRAMUL CO 11	PEG-11 Castor Oil	W/O co-emulsifier, lipid replenisher	x	x	x	x
LUCRAMUL CO 18	PEG-18 Castor Oil	O/W emulsifier, fabric/hair softener	x	x	x	x
LUCRAMUL CO 26	PEG-26 Castor Oil	O/W emulsifier, dispersant, mild emollient	x	x	x	x
LUCRAMUL CO 30	PEG-30 Castor Oil	solubilizer for light oils, wetting agent, cleanser	x	x	x	x
LUCRAMUL CO 35 A	PEG-35 Castor Oil	essential oil solubilizer, crystal-clear microemulsions	x	x	x	x
LUCRAMUL CO 40	PEG-40 Castor Oil	fragrance solubilizer, styling co-emulsifier	x	x	x	x
LUCRAMUL CO 48 C	PEG-48 Castor Oil	high-performance solubilizer, heavy lipid emulsifier	x	x	x	x
LUCRAMUL SML 20	Polysorbate 20	emulsifier and solubilizer for rinse-off systems, supporting transparency, stability and reliable incorporation of fragrance and oil components		x	x	
LUCRAMUL SMO 20	Polysorbate 80	O/W emulsifier for light to medium oil phases		x	x	
LUCRAMUL STO 20	Polysorbate 85	co-emulsifier or dispersing agent in heavy oil systems		x	x	x
LUCRAMUL SHO 40	Sorbeth-40 Hexaoleate	used as O/W emulsifier to stabilize even demanding lotions and creams, thickening agent and solubilizer		x	x	
LUCRAMUL SHO 40 E	Sorbeth-40 Hexaoleate, desalted	desalted grade for applications with higher requirements for purity and formulation stability		x	x	

PERSONAL CARE

PRODUCT OVERVIEW

CHEMICALS			APPLICATION			
PRODUCTS	INCI / CHEMISTRY	BENEFIT	EMOLLIENT	RINSE-OFF	SKIN CARE	HAIR
LUCRAMUL SHO 50	Sorbeth-50 Hexaoleate	used as O/W emulsifier to stabilize even demanding formulations, cleansing of heavy oils and makeup, dispersing agent for organic UV filters/sun care products		x	x	
LUCRAMUL 1803	Ceteareth-3	emulsifier and consistency agent for structured skin-care formulations, cleansing agent			x	x
LUCRAMUL 1820	Ceteareth-20	emulsifier for creams and lotions, improves spreadability and gives products a smooth, silky feel on skin and hair			x	x
LUCRAMUL 1807	Steareth-7	superior emulsion stability, improves spreadability			x	x
LUCRAMUL 1850	Steareth-50	emulsifier, cleansing agent, aids in gel-forming and consistency regulation			x	x
LUCRAMUL OA 07	PEG-7 Oleate	emulsifier, cleansing agent, lowers liquid surface tension to remove dirt and oils in cleansers or shampoos	x	x	x	
LUCRAMUL OA 10	PEG-10 Oleate	emulsifier, cleansing agent, lowers liquid surface tension to remove dirt and oils in cleansers or shampoos	x	x	x	
LUCRAMUL CFA 10	PEG-10 Cocoate	emulsifier, cleansing agent, thickener and foam stabilizer		x	x	x
LUCRAMUL KFA 05	PEG-5 Cocoamine	foam booster in shampoo and cleansers, hair wetting and softening, dispersing agent for dyes in hair color products		x		x
LUCRAMUL KFA 12	PEG-12 Cocoamine	hair-conditioning and antistatic agent, stabilize active ingredients in alkaline formulas		x		x
LUCRAMUL KFA 15	PEG-15 Cocoamine	hair-conditioning and antistatic agent, dissolves difficult-to-blend ingredients, provides smooth texture in lotions and sunscreens		x	x	x
LUCRAMUL KFA 20	PEG-20 Cocoamine	hair-conditioning and antistatic agent,commonly used in rinse-off hair dyes and color preparations, cleansing agent		x	x	x
LUCRAMUL KFA 05 M	PEG-5 Cocomonium Methosulfate	hair-conditioning and antistatic agent			x	x
LUCRAMUL KFA 15 M	PEG-15 Cocomonium Methosulfate	hair-conditioning and antistatic agent			x	x

EMOLLIENTS

Emollient-focused formulations benefit from ingredients that balance skin feel, spreadability and formulation stability. LEVACO offers personal-care-oriented ethoxylates and castor oil derivatives suited to modern concepts that call for clear performance and good formulability. Emollient applications in particular call for mild, versatile structures that support both sensory and technical requirements.

RINSE-OFF

Rinse-off formulations require surfactants and auxiliaries that reliably combine cleansing, foam generation and formulation stability. In addition to cleansing performance, the controlled incorporation of fragrances, oils and other formulation components is particularly important in these applications.

SKIN CARE

Skin-care formulations place high demands on emulsification, skin compatibility and sensory properties. Carefully selected nonionic surfactants and emulsifiers make it possible to tailor these characteristics to the intended formulation concept.

HAIR CARE

Hair-care formulations require effective ingredients for conditioning, combability, antistatic performance and formulation stability. A well-balanced combination of care benefits and technical processability, together with a high degree of formulation flexibility is especially important in hair care.
